[h2]:

**Flame resistant clothing that's comfortable AND safe?  
You got it, thanks to our special cotton material.**

[body text]:

Nobody likes to feel uncomfortable in their workwear.

You and your staff are working hard. But it's warm and your shirts are getting a little itchy. Sweat and static are starting to build up. Sound familiar?

If you have to wear flame-resistant clothing for work, but enjoy looking good and feeling fresh, then the **Tiger FR Henley Shirt** is exactly what you've been looking for.

[h2]:

**Feel great and stay safe at work**

## **Less shrinking, more comfort, greater protection**

[body text]:

Many manufacturers use Proban for their woven-fabric coveralls, trousers and shirts. But at **Tiger** we use our special **100% fire resistant cotton**, coupled with our knitted fabric technique, to create protective garments that allow your body to breathe.

[h3]:

**This means you can be comfortable and protected, and still look good.**

[body text]:

Our knitted cotton shirts and hoodies are soft, stretchy, comfortable and cool to wear, and offer many more benefits than other woven materials:

- No shrinkage, so your shirt stays the perfect fit for you
- Low sweat build-up thanks to the fabric's permeability and absorbency
- No clinginess from static build-up
- Guaranteed fire-resistance for the life of the garment
- Environmentally-friendly: biodegradable, recyclable and produced using sustainable methods

The knitted cotton **Tiger FR Henley Shirt** also scores much higher ratings than normal woven materials in **Electric Arc** (11.6 calories/cm<sup>2</sup>) and **Flash Fire** [insert data] tests.
